Thomas Guggenheim, Ph.D.  
& Nitin Tople  
SABIC Innovative Plastics  

An Overview of SABIC  
Followed by Two Technical Presentations  
Website: http://www.sabic.com/corporate/en/

Abstract  
This seminar will serve to describe/introduce SABIC, an unfamiliar company to most U.S. technologists. Two technical talks will also be presented to illustrate the type of work that might engage a process engineer/chemist at SABIC. One topic involves the recovery of sodium nitrite from a formerly incinerated waste stream. The other involves the redesign of a failed condenser in a nitration facility.

Refreshments will be served.
